Message of CEO

Creative textile and apparel services is an independent audit firm having knowledgeable & qualified inspectors. We provide 3rd party inspection services to help clients, retailers, trading partners, importers and manufacturers to assess product quality, so it conforms to internationally accepted standards such MIL-STD_105E (ANSI/ASQCZ1.4. BS6001.DIN40080 AND ISO 2859). 4. Point system and AQL 2.5/4.0. We specialize in providing inspection services, i.e., inspection of garments, towels, and home textiles. An inspection team is a cohesive group of technologists that undertake multi-stage inspections which is aimed at quality upgradation of your merchandise.

We believe that only through professional excellence and uncompromising dedication to our client's requirements we can truly fulfil our mission. We pride ourselves in our commitment, services & ethics: hence we offer a uniquely personal approach to our customer's requirements. CTAS observes the following regimen. We are fully dedicated to an internationally accepted inspection code and practice. We implement strict business ethics and compliance codes throughout our organization.

The aim of our service is to reduce and eliminate any risk you may face in accepting defective products that can put business at risk, as they often lead to unhappy customers, lost sales, and operations disruption, rework and even safety and legal issues.

MINIMUM REQUIREMENT OF QA HIRING

- 1. Basic apparel manufacturing knowledge.
- 2. Ability to read and write in basic English.
- 3. Basic mathematical skills.
- 4. Basic Computer skills.
- 5. Internet capability.
- 6. Proactive in communicating any discrepancies or problems found.

A new QA will undergo 90 days observation and training to ensure each factory has pertinent knowledge of buyer's standards, inspection techniques and can instruct the vendor's quality personnel. The primary function of the QA is to review buyer's production for both in-line and final shipping quality. The auditor is required to complete 3 months start up and training period to demonstrate his auditing skills and the ability to discern by quality standard

We offer the following services:

- Pre-Production Inspection (PPI)
- In-Line Inspection & Process (ILI&P)
- During Production Inspection (DUPRO)
- CAP (CORRECTIVE ACTION PLAN)
- Fabric Inspection and Process (FIP)
- Final Random Inspection and Process(FRI)
- NCR (Non Compliance Report).
- The Eight steps of the 8D Methodology
- Lab Testing.
- Customers compliance audits

OUR SERVICES

Correcting Action Plan (CAP):

This is a document that is used in quality management that outlines a set of steps for addressing issues and gaps in business operations a process that could negatively impact the business. It describes the approach for resolving an issue that interferes with reaching company goals.

Pre-Production Inspection (PPI):

PPI takes place before the start of bulk production; PPI can assure the client about raw materials verification and status After PPI, the client is sure that the supplier has the right/adequate raw material for quality

In-Line Inspection & Process (ILI&P):

Once the goods arrive in stitching department, we send our Q.A for random in-line inspections. He goes to the factory and does a random in-line inspection and makes a report of his findings, From there onwards the entire garment or home textile product is scrutinized to the finishing and packing stage. Regular pre-finals are also conducted along with actual final inspections.

DUPRO takes place when approximately 32 to 50% production is completed re-insuring that initial discrepancies have been rectified and a check in the average quality of production runs. The main benefit of the inspection is that it allows another chance to apply corrective actions where necessary.

OUR SERVICES

Final Random Inspection and Process (FRI):

FRI is to evaluate the problem against 100% finished and ready-to-export goods. FRI is a very useful standard quality assurance check before shipment. For evaluation of final products in the shipped. FRI is conducted for appearance, quantity, quality, size, specification, color and packing method/details After FRI the client has a very clear picture of his incoming product.

Fabric Inspection and Process (FIP):

It is understood that due to the nature of the manufacturing process, a supplier may produce materials that contain noticeable defects. Due to this possibility, buyer may require 100% inspection of all greige fabric rolls and production dye lots. The purpose of inspection is to determine the quality and acceptability of our materials. Copies of inspection results must accompany each fabric shipment. Any fabric rolls that do not conform to the buyer quality standard must be rejected.

CTAS non-conforming product is bad for both CTAS as well as the vendors because if a customer receives a defective product it hurts the buyer's brand image. Non-Compliance Reports (NCR) are directly integrated into all quality issues found by the buyer's team in the head office. A NCR is a step -by- Step process of determining a problem's root, cause, implementing the appropriate corrective action, and preventing reoccurrence. This process follows the problem using the 8D solving methodology.

8D METHODOLOGY

The Eight steps of the 8D Methodology

- Do Make a plan
- D1 Put Together a team
- D2 Define the problem
- D3 Implement a Temporary Fix
- D4 Identify root Causes and choose a solution
- D5 Confirm the Solution Resolves the problem
- D6 Fully Implement the solution
- D7 Prevent Recurrence

Laboratory Testing:

We are affiliated with a prestigious and professional 3rd party lab which provides lab testing services per our client's requirements.

Quality Standards:

MIL-STD-105E (ANSI/ASQC Z1.4, BS6001, DIN40080 AND ISO 2859), 4-Point system and AQL 2.5/4.0.
